TITLE : SHEET LIKE ADSORBENT HAVING MAGNETISM AND FIRE RETARDANCY

ABSTRACT : PURPOSE: To impart various shapes by post-processing by dispersing an adsorbent and a powder of a magnetic material and/or a powder of a fire retardant material in an emulsion based on latex, carboxy methyl cellulose and water and adding the resulting dispersion to a sheet to form a sheet like adsorbent.

CONSTITUTION: An adsorbent powder such as activated carbon and a powder of a magnetic material such as ferrite and/or a powder of a fire retardant material such as aluminum hydroxide are dispersed in an emulsion based on latex, carboxy methyl cellulose and water. This dispersion is infiltrated in a sheet and the impregnated sheet is degassed to form a sheet like adsorbent. This sheet like adsorbent is molded into a corrugated cardboard shape or a honeycomb shape to be reduced in its pressure loss and increased, in its adsorbing speed.
